Objective

Motivated Computer Science student and aspiring software engineer seeking to enhance experience in Java programming with a passion for exploring diverse technology fields to acquire valuable skills. Seeking internship or entry-level opportunities to leverage my technical skills, creativity, and problem-solving abilities

Technical Skills

Programming Languages / Technologies : Java , Servlet, JSP, JSTL, MySQL

Client-Side Technologies: HTML, CSS, JavaScript, JQuery, Bootstrap, AJAX

Tools & Technologies: Spring Framework, SpringBoot, Hibernate ORM, Github, SqlYog, API, Visual Studio Code, Eclipse

Soft Skills: Team Collaboration, Communication, Adaptability, Attention to Detail

Academic Details

Bachelor of Technology (B.Tech) in Computer Science :

(Expected Graduation: 2025)

Indus University, Ahmedabad, Gujarat, India

Cumulative Score: 8/10

Higher Secondary Certificate (H.S.C) :

(Graduated: 2021)

P. P. Savani Centre For Excellence, Surat, Gujarat, India

Cumulative Score: 85%

Experience/Projects

Softvan Pvt Ltd

January 2024 – June 2024

Software Developer

Gujarat, India

- Contributed to a project by developing a robust frontend and backend module using **Spring Boot**.
- Integrated Spring Security with **JSON** Web Token (JWT) for REST **API** authentication and authorization.
- Collaborated** with cross-functional teams to ensure seamless project execution and delivery.

Axisray

July 2023 – December 2023

Backend-Developer(JAVA) Intern

Gujarat, India

- Received comprehensive training in **Java development**.
- Worked on various Java-based projects, focusing on coding, and **oop** concepts.

Projects

File Management System | Spring Boot, Java, REST API, MySQL

Ongoing Project

- Developing a comprehensive File Management System using Spring Boot, enabling secure file upload, download, and organization.
- Integrated Spring Security with JWT for robust authentication and authorization.
- Utilized AWS cloud services for scalable storage solutions and deployment, ensuring high availability and reliability.

College Management System | RESTAPI, Spring Boot, Java

Dec 2023 – March2023

- Developed a college management system for efficient student and class management, using Hibernate, Bootstrap, jQuery, Git, and MySQL.
- Implemented CRUD operations with organized file structure, naming conventions, and a service layer.

Train Management System | Core Java

Aug 2023 – Sep 2023

- Developed a comprehensive Train Management System as a minor project using Object-Oriented Programming (OOP) principles and core Java.
- The system includes functionalities for scheduling trains, booking tickets, managing reservations, and checking train timings and destinations.

Courses and Certifications

-The Complete 2024 Web Development Bootcamp

Udemy

-"DevOps 101" workshop

CSE-Department, Indus University

- AWS Cloud Foundation

Aws-academy
